Eric Lindberg, Chairman and Interim President and CEO of Grocery Outlet said, "Our double-digit third quarter net sales growth reflects the strong positioning of our consumer offering – value continues to win in the market and we continue to grow our share of consumer non-discretionary spending."

Mr. Lindberg continued, "While these results were generally consistent with our expectations, our execution limited growth and earnings during the period. Challenges with the systems conversion have hindered our performance over the past year, and while we have made substantial progress on the implementation, it is critical that we return our focus to what we do best: executing well on the fundamentals and delivering outstanding value to our customers through our dedicated independent operators."

Non-GAAP Financial Information:

In addition to reporting financial results in accordance with accounting principles generally accepted in the United States ("GAAP"), management and the Board of Directors use EBITDA, adjusted EBITDA, adjusted net income and adjusted earnings per share as supplemental key metrics to assess the Company's financial performance. These non-GAAP financial measures are also frequently used by analysts, investors and other interested parties to evaluate the Company and other companies in the Company's industry. Management believes it is useful to investors and analysts to evaluate these non-GAAP measures on the same basis as management uses to evaluate the Company's operating results. Management uses these non-GAAP measures to supplement GAAP measures of performance to evaluate the effectiveness of the Company's business strategies, to make budgeting decisions and to compare the Company's performance against that of other peer companies using similar measures. In addition, the Company uses adjusted EBITDA to supplement GAAP measures of performance to evaluate performance in connection with compensation decisions. Management believes that excluding items from operating income, net income and net income per diluted share that may not be indicative of, or are unrelated to, the Company's core operating results, and that may vary in frequency or magnitude, enhances the comparability of the Company's results and provides additional information for analyzing trends in the Company's business.

Management defines EBITDA as net income before net interest expense, income taxes and depreciation and amortization expenses. Adjusted EBITDA represents EBITDA adjusted to exclude share-based compensation expense, loss on debt extinguishment and modification, asset impairment and gain or loss on disposition, acquisition and integration costs, costs related to the amortization of inventory purchase accounting asset step-ups and certain other expenses that may not be indicative of, or are unrelated to, the Company's core operating results, and that may vary in frequency or magnitude. Adjusted net income represents net income adjusted for the previously mentioned adjusted EBITDA adjustments, further adjusted for the amortization of property and equipment purchase accounting asset step-ups and deferred financing costs, tax adjustment to normalize the effective tax rate, and tax effect of total adjustments. Basic adjusted earnings per share is calculated using adjusted net income, as defined above, and basic weighted average shares outstanding. Diluted adjusted earnings per share is calculated using adjusted net income, as defined above, and diluted weighted average shares outstanding.

These non-GAAP measures may not be comparable to similar measures reported by other companies and have limitations as analytical tools, and you should not consider them in isolation or as a substitute for analysis of the Company's results as reported under GAAP. The Company addresses the limitations of the non-GAAP measures through the use of various GAAP measures. In the future the Company will incur expenses or charges such as those added back to calculate adjusted EBITDA or adjusted net income. The presentation of these non-GAAP measures should not be construed as an inference that future results will be unaffected by the adjustments used to derive such non-GAAP measures.

The Company has not reconciled the non-GAAP adjusted EBITDA and adjusted diluted earnings per share forward-looking guidance included in this release to the most directly comparable GAAP measures because this cannot be done without unreasonable effort due to the variability and low visibility with respect to taxes and non-recurring items, which are potential adjustments to future earnings. The Company expects the variability of these items to have a potentially unpredictable, and a potentially significant, impact on the Company's future GAAP financial results.
